

# Spill Kits

Please place spill kits in easy to access areas. Train staff on proper clean up procedures. NEVER hose down spills, this will contaminate our groundwater and soil.

## Very Important!

[EPA Solvent-Contaminated Wipes Rule Making- 2013 Final Rule](#)

In 2013, EPA issued a final rule that modifies the hazardous waste management regulations for solvent-contaminated wipes under the Resource Conservation and Recovery Act (RCRA). Specifically, this rule revises the definition of solid waste to conditionally exclude solvent-contaminated wipes that are cleaned and reused and revises the definition of hazardous waste to conditionally exclude disposable solvent-contaminated wipes. The purpose of this final rule is to provide a consistent regulatory framework for solvent-contaminated wipes that is appropriate to the level of risk posed by these wipes in a way that maintains protection of human health and the environment, while reducing overall compliance costs for industry, many of which are small businesses.
